Occupation: Arbitrator, Mediator

Experience: Over 45 years of railroad service including 23 years as a full-time Hearing Officer conducting and rendering decisions for formal disciplinary cases involving the complete spectrum of rule issues. The purpose of this regional position, which covered 17 states, was to administer the disciplinary hearing process in an independent, efficient and equitable manner while protecting the employee's right to a fair and impartial investigation. The position interfaced with all of the railroad industry's labor organizations. During my tenure I rendered over 2500 decisions and mediated the negotiated resolution of over 500 additional cases. My career also included system level rules department positions and operating field positions as a trainmaster and assistant transportation superintendent, I believe that my career experience in both management and as a clerk, tower operator, and train dispatcher, has provided me with a well-rounded background that might be especially appreciated by parties seeking an arbitrator with both railroad-specific knowledge and understanding.
